VisionPro 6900 Series Adjustable Dual LCD Support Arm

The VisionPro 6900 Series Dual LCD Support Arm is capable of supporting two monitors each weighing between 3.5kg -9kg. Monitors can be positioned in a dual horizontal or dual vertical configuration to suit the individual user, application or environment.

With +/-90° rotation, +/-90° tilt and +/-90° swivel the new pivot 3-axis adjustment provides the widest range of viewing positions and angles of any monitor arm of its type.

The VisionPro 6900 series enables the user to achieve almost any viewing angle. The arm can be extended to 560mm and retracted to a compact size to increase work surface area when not in use.

The VisionPro 6900 has a unique parallel head unit enabling finger touch repositioning of the arm whilst maintaining the angle of the monitor.

Available in desk clamp, bolt through desk or wall mount fitting, compact (380mm max reach) and extended (560mm max reach). Each configuration provides up to 304mm of height adjustment.

Designed to suit any application within the office, production or medical environments. Precision manufactured in die-cast aluminium with internal cable management.

Available in a silver finish.
